NOTES

9. Set only contains two rear springs.
11. Not suitable for cars with level adjustment.
12. Not suitable for cars with automatic or electronic shock absorbing regulation.
13. Not suitable for 4WD (four-wheel drive) cars.
14. Not suitable for station wagons.
34. Conical front spring.
35. Cylindrical front springs.
72. When used with a TUV certificate, be aware of the minimum height of the blinker/indicator. This must be at least 350mm. If this is not correct the blinker/indicator must be moved to another place.
90. Not suitable for 2WD (Two-Wheel Drive) cars

NOTES

10. These lowering springs can only be used with shortened shock absorbers.
11. Not suitable for cars with level adjustment.
13. Not suitable for 4WD (four-wheel drive) cars.
14. Not suitable for station wagons.
16. For models up to 8/79, the original springs holders (Art.No.861412113B) must be used on the front axle.
21. Excluding M-models, S4 models and cars with Audi sport chassis.
25. The bumpstop must be shortend to 45 mm.
27. Not suitable for "Turbo" models.
33. Not suitable for GTI/GLI/GTE/GLE/GSI models.
44. For cars with standard lowering, the indicated lowering will be reduced with the amount of the standard lowering.
45. We recommend to use shortend shock absorbers for this set.
75. Not suitable for cars with multilink rear suspension
83. About 10mm less lowering for vehicles with Audi sport-suspension
84. About 20mm less lowering for vehicles with Audi S-line sport-suspension

| Brand | Model | Engine | Chassis | Type | Year | Lowering | Lowering | Notes | Pricing |
|-------|-------|--------|---------|------|------|----------|----------|-------|---------------|
| | | | | | | Front | Rear | | Excl. 21% VAT |

85. Only suitable for vehicles with multilink rear suspension.
86. About 15mm less lowering for vehicles with sportsuspension.
87. Only suitable for vehicles with torsion-beam axle
88. Not suitable for vehicles with torsion-beam axle
90. Not suitable for 2WD (Two-Wheel Drive) cars
91. Set only contains 2 front springs
99. Also suitable for Facelift model Magnetic Suspension
104. About 15mm less lowerering for vehicles with S-line suspension
149. Tuv/Goca only valid for cars with 66kW-142kW
154. Not suitable for vehicles with airsuspension
164. About 20mm less lowering for vehicles with Audi sportsuspension
175. Rear suspension: remove the lower plastic spring seat on the suspension arm by pushing the plug out underneath the suspension arm.
Replace the lower plastic spring seat with the supplied rubber spring seat.
Make sure the bottom tip of the spring pointing towards the outside.

NOTES

4. Not suitable for models with EDC-system.
10. These lowering springs can only be used with shortened shock absorbers.
11. Not suitable for cars with level adjustment.
12. Not suitable for cars with automatic or electronic shock absorbing regulation.
13. Not suitable for 4WD (four-wheel drive) cars.
21. Excluding M-models, S4 models and cars with Audi sport chassis.
25. The bumpstop must be shortend to 45 mm.
26. In the case cars with a level regulation facility, the rear of the car can be lowered by approx. 15mm if desired by changing the settings on the level regulation system.
44. For cars with standard lowering, the indicated lowering will be reduced with the amount of the standard lowering.
65. TUV is not suitable for 540i
77. Only suitable for Touring cars with air suspension at the rear(set contains only front springs)
90. Not suitable for 2WD (Two-Wheel Drive) cars
91. Set only contains 2 front springs
95. The rear of the car can be lowered by the vehicle diagnostic system
106. About 10mm less lowerering for vehicles with M-sport suspension
107. About 10mm less lowerering for vehicles with Adaptine M-sport suspension
134. About 25mm less lowering for vehicles fitted with factory sports- or M-Sports suspension
141. Not suitable for vehicles with self leveling air suspension on the rear axle
142. Due to the lower ground clearance, caution needs to be taken to protect the battery pack
144. The rear spring change in early 1999 relates to the introduction of the heavy-duty 6-cylinder rear axle on 4-cylinder models
146. The rear consists of adjustable lowering links
154. Not suitable for vehicles with airsuspension
181. For a correct ride height the lowering links should be adjusted to a length of 68-72mm center to center
182. For a correct ride height the lowering links should be adjusted to a length of 64-68mm center to center
187. 1mm of adjustment on the lowering link will adust the vehicle height by approx. 5mm
188. Min. ride height approx. 355mm in the rear, measured from center of wheel to wheel arch, more lowering will result in poor ride quality
189. Lowering the ride height reduces the amount of air in the suspension. Lowering excessively might cause errors in the computer

NOTES

- 9. Set only contains two rear springs.
- 13. Not suitable for 4WD (four-wheel drive) cars.
- 24. Lowering only suitable at the front axle.
- 25. The bumpstop must be shortend to 45 mm.
- 53. Take the rubber that is on the original spring off and put it on the loweringspring on the same place
- 62. The bumpstop must be shortend to 40 mm.
- 79. Not suitable for cars with Hydractive III + suspension
- 108. Only suitable for vehicles with factory raised payload
- 109. Not suitable for vehicles with factory raised payload
- 110. Only suitable for vehicles with standard payload
- 111. Not suitable for vehicles with standard payload
- 112. Wheelbase: 2925mm
- 113. Wheelbase: 3275mm
- 114. Vehicle length: 4606/4609mm
- 115. Vehicle length: 4956/4983mm
- 116. Vehicle length: 5308/5333mm
- 117. Kastenwagen geschlossen / gesloten bestel
- 118. Kastenwagen doppelkabine / dubbele cabine
- 122. The indicated lowering can differ due to different variants and options
- 151. Short Wheelbase / 2785mm

NOTES

9. Set only contains two rear springs.
10. These lowering springs can only be used with shortened shock absorbers.
11. Not suitable for cars with level adjustment.
12. Not suitable for cars with automatic or electronic shock absorbing regulation.
13. Not suitable for 4WD (four-wheel drive) cars.
14. Not suitable for station wagons.
19. Not suitable for cabriolet, convertible designs.
24. Lowering only suitable at the front axle.
25. The bumpstop must be shortend to 45 mm.
45. We recommend to use shortend shock absorbers for this set.
53. Take the rubber that is on the original spring off and put it on the loweringspring on the same place
55. Mount the rear spring with the progressive part up !!, this is very important.
64. The front bumpstop must be shortend to 20 mm.

| Brand | Model | Engine | Chassis | Type | Year | Lowering | Lowering | Notes | Pricing |
|-------|-------|--------|---------|------|------|----------|----------|-------|---------------|
| | | | | | | Front | Rear | | Excl. 21% VAT |

91. Set only contains 2 front springs
109. Not suitable for vehicles with factory raised payload
110. Only suitable for vehicles with standard payload
122. The indicated lowering can differ due to different variants and options
143. We recommend to install the shortened rear bump stops from a Fiat Turbo Coupe part.nr. 7782710, length appr. 60mm
151. Short Wheelbase / 2785mm
155. About 20mm less lowering for vehicles fitted with Koni shock absorbers and Eibach springs
166. Not suitable for vehicles with factory raised ground clearance
168. Not suitable for vehicles with 1000kg payload
170. Not suitable for vehicles with 650kg payload
171. Long wheelbase / 2975mm

NOTES

4. Not suitable for models with EDC-system.
6. Not suitable for 16V/20V/24V and RSI models.
9. Set only contains two rear springs.
10. These lowering springs can only be used with shortened shock absorbers.
11. Not suitable for cars with level adjustment.
12. Not suitable for cars with automatic or electronic shock absorbing regulation.
13. Not suitable for 4WD (four-wheel drive) cars.
14. Not suitable for station wagons.
24. Lowering only suitable at the front axle.
31. The indicated lowering is the effective lowering. Standard lowering has already been considered.
34. Conical front spring.
35. Cylindrical front springs.
45. We recommend to use shortend shock absorbers for this set.
48. This set is only useble with the original shock absorber. With other shock absorbers the lowering set will not have enough preload.
55. Mount the rear spring with the progressive part up !!, this is very important.
67. Cut off 1 ring from bump rubber
87. Only suitable for vehicles with torsion-beam axle
97. Not suitable for double cabin/5-seater/7-seater
98. Not suitable for 2014 facelift and later
121. Not suitable for facelift model 07/2018 and later
122. The indicated lowering can differ due to different variants and options
139. Not suitable for Ford Focus Vignale
140. Not suitable for vehicles with Magneride suspension
145. We recommend to shorten the rear bumpstop 30mm from the bottom for better comfort
152. We recommend to shorten the rear bumpstop 65mm from the bottom for better comfort
178. The ride can be harsh when the vehicle is loaded

NOTES

13. Not suitable for 4WD (four-wheel drive) cars.

53. Take the rubber that is on the original spring off and put it on the loweringspring on the same place

142. Due to the lower ground clearance, caution needs to be taken to protect the battery pack

NOTES

3. Not suitable for 4WS (4 wheel steering) models.
13. Not suitable for 4WD (four-wheel drive) cars.
14. Not suitable for station wagons.
44. For cars with standard lowering, the indicated lowering will be reduced with the amount of the standard lowering.
45. We recommend to use shortend shock absorbers for this set.
53. Take the rubber that is on the original spring off and put it on the loweringspring on the same place
73. From chassis nr.: GG1***233651
74. Till chassis nr.: GG1***233651 / set contains two different front springs, see code on springs
135. The front coil-spring part number changed in February 2004 coincides with a specification change in shock absorber
136. From chassis nr.: GY1***467620
137. Till chassis nr.: GY1***467620 / set contains two different front springs, see code on springs

NOTES

- 8. Not suitable for cars equipped with standard sportsuspensions.
- 9. Set only contains two rear springs.
- 11. Not suitable for cars with level adjustement.
- 13. Not suitable for 4WD (four-wheel drive) cars.
- 14. Not suitable for station wagons.
- 15. Not suitable for cars with hydropneumatic suspension.
- 19. Not suitable for cabriolet, convertible designs.
- 20. Mounting instructions for W201/202/123/124/126: Max. lowerering is obtained by using single points (single stud) spring rubber bases on the front and rear axles.
In case, the 3 point or 4 point rubber bases installed by the manufacturer have to be exchanged accordingly (spare part available from DB agents) in case of corresponding accessories, as automatic shifting, air conditioning etc. However on the front the 3 point or 4point rubber bases must always be used in case of trailer operation (trailer coupling) on the rear axle, 3 point rubber basses must always be used.
- 36. Not suitable for cars with Full Options.
- 37. Only for cars with Full Options.
- 44. For cars with standard lowering, the indicated lowering will be reduced with the amount of the standard lowering.
- 53. Take the rubber that is on the original spring off and put it on the loweringspring on the same place
- 55. Mount the rear spring with the progressive part up !!, this is very important.
- 70. The MB E-class S211 has standard level adjustment at the rear. So the car can be lowered at the back by setting the level adjustment. Therefore this set only contains frontsprings.
- 75. Not suitable for cars with multilink rear suspension
- 85. Only suitable for vehicles with multilink rear suspension.
- 86. About 15mm less lowering for vehicles with sportsuspension.
- 87. Only suitable for vehicles with torsion-beam axle
- 89. Cut off 2 rings from the bottomside of the front bumpstops for extra lowering at the front
- 90. Not suitable for 2WD (Two-Wheel Drive) cars
- 91. Set only contains 2 front springs
- 96. Not for configuration codes: SA950 / SA483 + 213, P84, the configuration codes can be taken from the data card of the vehicle
- 102. Only suitable for vehicles to chassis no. 3603471
- 103. Only suitable for vehicles from chassis no. 3603472
- 105. Not suitable for vehicles with AMG suspension
- 103. Only suitable for vehicles from chassis no. 3603472
- 105. Not suitable for vehicles with AMG suspension
- 109. Not suitable for vehicles with factory raised payload
- 110. Only suitable for vehicles with standard payload
- 122. The indicated lowering can differ due to different variants and options
- 123. About 30mm lowering for Vito Crew Van
- 124. Suitable for vehicles with factory comfort suspension (code 485)
- 125. Suitable for vehicles with factory comfort and lowered chassis suspension (code 677)
- 126. About 15-10mm less lowering for vehicles with factory comfort and lowered chassis suspension (code 677)
- 127. Not suitable for vehicles with factory sport suspension / AMG-sport suspension (code 486)
- 128. Suitable for vehicles with factory sport suspension / AMG-sport suspension (code 486)
- 129. Suitable for vehicles with configuration codes: 950/P84, the configuration codes can be taken from the data card of the vehicle
- 130. Not suitable for vehicles with factory comfort suspension (code 485)
- 131. Not suitable for vehicles with factory comfort and lowered chassis suspension (code 677)
- 146. The rear consists of adjustable lowering links
- 147. The adjustment ratios for the rear axle are as follow: Per 1 mm shorter = 10mm lowering on the vehicle. Per 1mm taller is a 10mm taller ride height on the vehicle.
- 154. Not suitable for vehicles with airsuspension
- 156. We recommend to shorten the rear bumpstop 22mm for better comfort and 10mm extra lowering
- 157. Not for vehicle with AMG Trial Package
- 166. Not suitable for vehicles with factory raised ground clearance
- 167. Short wheelbase: 2716mm
- 190. The adjustment ratios for the rear axle are as follow: Per 1 mm shorter = 10mm lowering on the vehicle. Per 1mm taller is a 10mm taller ride height on the vehicle
- 196. We recommend to shorten the rear bumpstop 34mm from the bottom for better comfort and 15mm extra lowering
- 197. Long wheelbase: 3100mm

NOTES

- 9. Set only contains two rear springs.
- 11. Not suitable for cars with level adjustment.
- 13. Not suitable for 4WD (four-wheel drive) cars.
- 14. Not suitable for station wagons.
- 27. Not suitable for "Turbo" models.
- 53. Take the rubber that is on the original spring off and put it on the loweringspring on the same place
- 55. Mount the rear spring with the progressive part up !!, this is very important.
- 75. Not suitable for cars with multilink rear suspension
- 80. Not suitable for Qashqai+2
- 85. Only suitable for vehicles with multilink rear suspension.
- 87. Only suitable for vehicles with torsion-beam axle
- 88. Not suitable for vehicles with torsion-beam axle
- 109. Not suitable for vehicles with factory raised payload
- 110. Only suitable for vehicles with standard payload
- 122. The indicated lowering can differ due to different variants and options
- 142. Due to the lower ground clearance, caution needs to be taken to protect the battery pack
- 156. We recommend to shorten the rear bumpstop 22mm for better comfort and 10mm extra lowering
- 166. Not suitable for vehicles with factory raised ground clearance
- 167. Short wheelbase: 2716mm

NOTES

9. Set only contains two rear springs.
10. These lowering springs can only be used with shortened shock absorbers.
11. Not suitable for cars with level adjustment.
13. Not suitable for 4WD (four-wheel drive) cars.
14. Not suitable for station wagons.
23. We recommend to shorten the bump stops to 30mm.
28. Special Tuning set. Installation must be done by professionals due to the extreme lowering of this setmodification may be necessary.
31. The indicated lowering is the effective lowering. Standard lowering has already been considered.
32. Not suitable for Kadett City.
34. Conical front spring.
35. Cylindrical front springs.
40. Not suitable for cars with Air Conditioning.
41. By choosing the lowering please note that the standard ride height in the front and in the rear is very different. After installations the lowering often appears to be different from the indicated lowering in the catalogue.
44. For cars with standard lowering, the indicated lowering will be reduced with the amount of the standard lowering.
45. We recommend to use shortend shock absorbers for this set.
50. Mount the front spring with the progressive part up !!, this is very important.
51. Take a good look how to mount the rear springs, this is very important.
53. Take the rubber that is on the original spring off and put it on the loweringspring on the same place
55. Mount the rear spring with the progressive part up !!, this is very important.
90. Not suitable for 2WD (Two-Wheel Drive) cars
92. Zu Buchstabe "E" in der 10.ten Stelle der Fzg-ident-Nr.: WOLGxxxxExxxxxx/till letter "E" on the 10th digit of VIN: WOLGxxxxExxxxxx
93. Ab Buchstabe "E" in der 10.ten Stelle der Fzg-ident-Nr.: WOLGxxxxExxxxxx/from letter "E" on the 10th digit of VIN: WOLGxxxxExxxxxx
108. Only suitable for vehicles with factory raised payload
109. Not suitable for vehicles with factory raised payload
110. Only suitable for vehicles with standard payload
111. Not suitable for vehicles with standard payload
112. Wheelbase: 2925mm
113. Wheelbase: 3275mm
114. Vehicle length: 4606/4609mm
115. Vehicle length: 4956/4983mm
116. Vehicle length: 5308/5333mm
117. Kastenwagen geschlossen / gesloten bestel
118. Kastenwagen doppelkabine / dubbele cabine
142. Due to the lower ground clearance, caution needs to be taken to protect the battery pack
151. Short Wheelbase / 2785mm
166. Not suitable for vehicles with factory raised ground clearance
168. Not suitable for vehicles with 1000kg payload
170. Not suitable for vehicles with 650kg payload
171. Long wheelbase / 2975mm

NOTES

- 9. Set only contains two rear springs.
- 13. Not suitable for 4WD (four-wheel drive) cars.
- 24. Lowering only suitable at the front axle.
- 33. Not suitable for GTI/GLI/GTE/GLE/GSI models.
- 45. We recommend to use shortend shock absorbers for this set.
- 53. Take the rubber that is on the original spring off and put it on the loweringspring on the same place
- 108. Only for vehicles with standard raised payload
- 109. Not suitable for vehicles with factory raised payload
- 110. Only suitable for vehicles with standard payload
- 112. Wheelbase: 2925mm
- 113. Wheelbase: 3275mm
- 114. Vehicle length: 4606/4609mm
- 115. Vehicle length: 4956/4983mm
- 116. Vehicle length: 5308/5333mm
- 117. Kastenwagen geschlossen / gesloten bestel
- 118. Kastenwagen doppelkabine / dubbele cabine
- 122. The indicated lowering can differ due to different variants and options
- 142. Due to the lower ground clearance, caution needs to be taken to protect the battery pack
- 151. Short Wheelbase / 2785mm
- 166. Not suitable for vehicles with factory raised ground clearance
- 168. Not suitable for vehicles with 1000kg payload
- 170. Not suitable for vehicles with 650kg payload
- 171. Long wheelbase / 2975mm

NOTES

- 3. Not suitable for 4WS (4 wheel steering) models.
- 6. Not suitable for 16V/20V/24V and RSI models.
- 24. Lowering only suitable at the front axle.
- 33. Not suitable for GTI/GLI/GTE/GLE/GSI models.
- 35. Cylindrical front springs.
- 45. We recommend to use shortend shock absorbers for this set.
- 47. The bumper from the front: cut one ring off from the middle of the rubber and glue the top back on.
- 51. Take a good look how to mount the rear springs, this is very important.
- 53. Take the rubber that is on the original spring off and put it on the loweringspring on the same place
- 54. Mount the rear spring with the white mark to the rear. This is very important.
- 55. Mount the rear spring with the progressive part up !!, this is very important.
- 56. Mount the rear spring with the progressive part down !!, this is very important.
- 82. Model Year 2011, upper springseat diameter is 83mm
- 91. Set only contains 2 front springs
- 109. Not suitable for vehicles with factory raised payload
- 110. Only suitable for vehicles with standard payload
- 122. The indicated lowering can differ due to different variants and options
- 133. With and without cup suspension
- 156. We recommend to shorten the rear bumpstop 22mm for better comfort and 10mm extra lowering
- 166. Not suitable for vehicles with factory raised ground clearance
- 167. Short wheelbase: 2716mm
- 196. We recommend to shorten the rear bumpstop 34mm from the bottom for better comfort and 15mm extra lowering
- 197. Long wheelbase: 3100mm

NOTES

10. These lowering springs can only be used with shortened shock absorbers.
11. Not suitable for cars with level adjustment.
13. Not suitable for 4WD (four-wheel drive) cars.
24. Lowering only suitable at the front axle.
44. For cars with standard lowering, the indicated lowering will be reduced with the amount of the standard lowering.
45. We recommend to use shortend shock absorbers for this set.
46. Cut off one ring from the top of the bump rubber, always cut from the top.
69. TUV only suitable with normal original bumpstop or sport original bumpstop. Do not shorten the bumpstops!! With the sport bumpstop the lowering will be a little more and also the driving will be better.
75. Not suitable for cars with multilink rear suspension
85. Only suitable for vehicles with multilink rear suspension.
86. About 15mm less lowering for vehicles with sportsuspension.
87. Only suitable for vehicles with torsion-beam axle
88. Not suitable for vehicles with torsion-beam axle
94. About 10-15mm less lowering for vehicles with FR suspension.
96. Not for configuration codes: SA950 / SA483 + 213, P84, the configuration codes can be taken from the data card of the vehicle

NOTES
175. Rear suspension: remove the lower plastic spring seat on the suspension arm by pushing the plug out underneath the suspension arm.
Replace the lower plastic spring seat with the supplied rubber spring seat.
Make sure the bottom tip of the spring pointing towards the outside.

- NOTES**
- 13. Not suitable for 4WD (four-wheel drive) cars.
 - 44. For cars with standard lowering, the indicated lowering will be reduced with the amount of the standard lowering.
 - 45. We recommend to use shortend shock absorbers for this set.
 - 68. No TUV available on the stationwagon, only suitable on the saloon.
 - 75. Not suitable for cars with multilink rear suspension
 - 86. About 15mm less lowering for vehicles with sportsuspension.
 - 87. Only suitable for vehicles with torsion-beam axle
 - 90. Not suitable for 2WD (Two-Wheel Drive) cars
 - 175. Rear suspension: remove the lower plastic spring seat on the suspension arm by pushing the plug out underneath the suspension arm.
Replace the lower plastic spring seat with the supplied rubber spring seat.
Make sure the bottom tip of the spring pointing towards the outside.

NOTES

44. For cars with standard lowering, the indicated lowering will be reduced with the amount of the standard lowering.

138. Due to the long wheel base and the lower ground clearance, daily practicality over speed bumps and sharp inclines will be limited with this lowering kit

NOTES

9. Set only contains two rear springs.
13. Not suitable for 4WD (four-wheel drive) cars.
14. Not suitable for station wagons.
33. Not suitable for GTI/GLI/GTE/GLE/GSI models.
45. We recommend to use shortend shock absorbers for this set.
63. Bumpstop front: cut off 20 mm from bottomside and remove plastic ring
108. Only suitable for vehicles with factory raised payload
109. Not suitable for vehicles with factory raised payload
110. Only suitable for vehicles with standard payload
112. Wheelbase: 2925mm
113. Wheelbase: 3275mm
114. Vehicle length: 4606/4609mm
115. Vehicle length: 4956/4983mm
116. Vehicle length: 5308/5333mm
117. Kastenwagen geschlossen / gesloten bestel
118. Kastenwagen doppelkabine / dubbele cabine
151. Short Wheelbase / 2785mm
166. Not suitable for vehicles with factory raised ground clearance
168. Not suitable for vehicles with 1000kg payload
169. Also for vehicles with high performance package
170. Not suitable for vehicles with 650kg payload
171. Long wheelbase / 2975mm
213. The inside diameter of the rear lowering spring is 113mm / the outside diameter of the rear lowering spring is 147mm
214. The inside diameter of the rear lowering spring is 99mm / the outside diameter of the rear lowering spring is 126mm

NOTES

6. Not suitable for 16V/20V/24V and RSI models.
8. Not suitable for cars equipped with standard sportsuspensions.
9. Set only contains two rear springs.
10. These lowering springs can only be used with shortened shock absorbers.
11. Not suitable for cars with level adjustement.
13. Not suitable for 4WD (four-wheel drive) cars.
16. For models up to 8/79, the original springs holders (Art.No.861412113B) must be used on the front axle.
17. For models up to 8/79, the original springs holders (Art.No.171412341A) must be used on the front axle.
18. For cars from 10/93, it may be necessary, due to different spring holder sizes on the front axle, to use the original spring holder (Art.No.1HO-412-341).
22. For 16V + VR6 and TDI, we recommend to change to sportshock absorbers.
24. Lowering only suitable at the front axle.
28. Special Tuning set. Installation must be done by professionals due to the extreme lowering of this setmodification may be necessary.
29. The indicated lowering can differ up to 25mm due to different models and options.
30. Not suitable for VR-6 models with Air Conditioning.
31. The indicated lowering is the effective lowering. Standard lowering has already been considered.
38. Not suitable for cars with Automatic Transmission.
43. Not suitable for G40 models.
44. For cars with standard lowering, the indicated lowering will be reduced with the amount of the standard lowering.
45. We recommend to use shortend shock absorbers for this set.
66. The front bumpstop must be shortend 15 mm from topside.
69. TUV only suitable with normal original bumpstop or sport original bumpstop. Do not shorten the bumpstops!! With the sport bumpstop the lowering will be a little more and also the driving will be better.
71. This partnumber is not GOCA (TUV) approved for Belgium.
75. Not suitable for cars with multilink rear suspension
78. Not for California
85. Only suitable for vehicles with multilink rear suspension.
86. About 15mm less lowering for vehicles with sportsuspension.
87. Only suitable for vehicles with torsion-beam axle
88. Not suitable for vehicles with torsion-beam axle
100. Only for European Version
122. The indicated lowering can differ due to different variants and options
138. Due to the long wheel base and the lower ground clearance, daily practicality over speed bumps and sharp inclines will be limited with this lowering kit
142. Due to the lower ground clearance, caution needs to be taken to protect the battery pack
145. We recommend to shorten the rear bumpstop 30mm from the bottom for better comfort
148. The rear consists of an adjustable flip kit for the leaf springs, consisting of metal plates.
152. We recommend to shorten the rear bumpstop 65mm from the bottom for better comfort
160. Remove the rubber on the bottom of the rearspring by carefully heating it up until spring comes loose, reuse on rear lowering spring
175. Rear suspension: remove the lower plastic spring seat on the suspension arm by pushing the plug out underneath the suspension arm.
Replace the lower plastic spring seat with the supplied rubber spring seat.
Make sure the bottom tip of the spring pointing towards the outside.
206. Mount the supplied rubber springseat on the underside of the rear lowering spring

NOTES

6. Not suitable for 16V/20V/24V and RSI models.

11. Not suitable for cars with level adjustment.

13. Not suitable for 4WD (four-wheel drive) cars.

14. Not suitable for station wagons.

24. Lowering only suitable at the front axle.

44. For cars with standard lowering, the indicated lowering will be reduced with the amount of the standard lowering.

| Brand | Model | Engine | Chassis | Type | Year | Lowering Front | Lowering Rear | Notes | Pricing Excl. 21% VAT |
|-------|-------|--------|---------|------|------|-------------------|------------------|-------|--------------------------|
|-------|-------|--------|---------|------|------|-------------------|------------------|-------|--------------------------|

49. For the Volvo V70 with automatic level adjustment, you can use the original shockabsorber from the Volvo S80. (Most of them don't have automatic level adjusted shock absorbers). Original Volvo shockabsorber: 8671-712
53. Take the rubber that is on the original spring off and put it on the loweringspring on the same place
55. Mount the rear spring with the progressive part up !!, this is very important.
56. Mount the rear spring with the progressive part down !!, this is very important.
75. Not suitable for cars with multilink rear suspension
86. About 15mm less lowering for vehicles with sportsuspension.
122. The indicated lowering can differ due to different variants and options
154. Not suitable for vehicles with airsuspension
165. Not suitable for V60/S60 Polestar Engineered
172. Only for vehicles without sport suspension
173. Not for vehicles with R-Design sport suspension
174. We recommend: remove serial distance blocks up to 20mm, over 20mm replace with 5mm spring pads / from 30mm replace with 10 or 15mm spring pads
176. Lowering the rear axle by using the included springs pads beneath the sideward seat area of the composite leaf spring
177. Removing the rear spring pads completely is also an option

NOTES

9. Set only contains two rear springs.
13. Not suitable for 4WD (four-wheel drive) cars.
109. Not suitable for vehicles with factory raised payload
110. Only suitable for vehicles with standard payload
113. Wheelbase: 3275mm
114. Vehicle length: 4606/4609mm
115. Vehicle length: 4956/4983mm
116. Vehicle length: 5308/5333mm
117. Kastenwagen geschlossen / gesloten bestel
118. Kastenwagen doppelkabine / dubbele cabine
151. Short wheelbase / 2785mm
166. Not suitable for vehicles with factory raised ground clearance
168. Not suitable for vehicles with 1000KG PAYLOAD
170. Not suitable for vehicles with 650KG PAYLOAD
171. Long wheelbase / 2975mm
185. This kit has been developed for vehicles that are constantly driven loaded, operation in the unladen state may result in a harsher ride than is desirable
199. Increases the ride height of the rear spring 25mm when not loaded / increases the ride height approximately 30-35mm when loaded
200. The springrate of the rear spring is 30% higher than the original rear spring
201. We recommend a minimum load of 200kg

| Brand | Model | Engine | Chassis | Type | Year | Lowering Front | Lowering Rear | Notes | Pricing Excl. 21% VAT |
|-------|-------|--------|---------|------|------|-------------------|------------------|-------|--------------------------|
|-------|-------|--------|---------|------|------|-------------------|------------------|-------|--------------------------|

202. The springrate of the front spring is approximately 20% higher than the original front spring

203. The springrate of the rear spring is approximately 20%-25% higher than the original rear spring

209. Increases the ride height of the rear spring about 30mm when not loaded / increases the ride height about 40mm when loaded

NOTES

9. Set only contains two rear springs.

13. Not suitable for 4WD (four-wheel drive) cars.

109. Not suitable for vehicles with factory raised payload

110. Only suitable for vehicles with standard payload

113. Wheelbase: 3275mm

114. Vehicle length: 4606/4609mm

115. Vehicle length: 4956/4983mm

116. Vehicle length: 5308/5333mm

117. Kastenwagen geschlossen / gesloten bestel

118. Kastenwagen doppelkabine / dubbele cabine

151. Short wheelbase / 2785mm

166. Not suitable for vehicles with factory raised ground clearance

168. Not suitable for vehicles with 1000KG PAYLOAD

170. Not suitable for vehicles with 650KG PAYLOAD

171. Long wheelbase / 2975mm

185. This kit has been developed for vehicles that are constantly driven loaded, operation in the unladen state may result in a harsher ride than is desirable

199. Increases the ride height of the rear spring 25mm when not loaded / increases the ride height approximately 30-35mm when loaded

200. The springrate of the rear spring is 30% higher than the original rear spring

201. We recommend a minimum load of 200kg

202. The springrate of the front spring is approximately 20% higher than the original front spring

203. The springrate of the rear spring is approximately 20%-25% higher than the original rear spring

NOTES

9. Set only contains two rear springs.

13. Not suitable for 4WD (four-wheel drive) cars.

91. Set only contains 2 front springs

179. FWD: increases the ride height of the front spring about 30mm / the spring rate is approximately 30% higher than the original spring rate

180. FWD/AWD/2.5PHEV: increases the ride height of the rear spring about 20/25mm when not loaded / increases the ride height about 40mm when loaded

200. The springrate of the rear spring is 30% higher then the original rear spring

202. The springrate of the front spring is approximately 20% higher then the original front spring

207. AWD: increases the ride height of the front spring about 20mm / the spring rate is approximately 20% higher than the original spring rate

208. Increases the ride height of the rear spring about 20mm when not loaded / increases the ride height about 50mm when loaded, results vary between different models

210. The springrate of the rear spring is approximately 20% - 30% higher then the original rear spring

211. The spring rate of the front spring is approximately 30% higher than the original spring rate

212. The spring rate of the rear spring is approximately 100% higher than the original spring rate

NOTES

9. Set only contains two rear springs.
13. Not suitable for 4WD (four-wheel drive) cars.
109. Not suitable for vehicles with factory raised payload

| Brand | Model | Engine | Chassis | Type | Year | Lowering | Lowering | Notes | Pricing |
|-------|-------|--------|---------|------|------|----------|----------|-------|---------------|
| | | | | | | Front | Rear | | Excl. 21% VAT |

- 110. Only suitable for vehicles with standard payload
- 113. Wheelbase: 3275mm
- 114. Vehicle length: 4606/4609mm
- 115. Vehicle length: 4956/4983mm
- 116. Vehicle length: 5308/5333mm
- 117. Kastenwagen geschlossen / gesloten bestel
- 118. Kastenwagen doppelkabine / dubbele cabine
- 151. Short wheelbase / 2785mm
- 166. Not suitable for vehicles with factory raised ground clearance
- 168. Not suitable for vehicles with 1000KG PAYLOAD
- 170. Not suitable for vehicles with 650KG PAYLOAD
- 171. Long wheelbase / 2975mm
- 185. This kit has been developed for vehicles that are constantly driven loaded, operation in the unladen state may result in a harsher ride than is desirable
- 199. Increases the ride height of the rear spring 25mm when not loaded / increases the ride height approximately 30-35mm when loaded
- 200. The springrate of the rear spring is 30% higher then the original rear spring
- 201. We recommend a minimum load of 200kg
- 202. The springrate of the front spring is approximately 20% higher then the original front spring
- 203. The springrate of the rear spring is approximately 20%-25% higher then the original rear spring
- 209. Increases the ride height of the rear spring about 30mm when not loaded / increases the ride height about 40mm when loaded

NOTES

- 9. Set only contains two rear springs.
- 13. Not suitable for 4WD (four-wheel drive) cars.
- 91. Set only contains 2 front springs
- 122. The indicated lowering can differ due to different variants and options
- 154. Not suitable for vehicles with airsuspension
- 178. The ride can be harsh when the vehicle is loaded
- 179. FWD: increases the ride height of the front spring about 30mm / the spring rate is approximately 30% higher than the original spring rate
- 180. FWD/AWD/2.5PHEV: increases the ride height of the rear spring about 20/25mm when not loaded / increases the ride height about 40mm when loaded
- 183. Increases the ride height of the front spring about 25mm / the spring rate is approximately 20% higher than the original spring rate, results vary between different models
- 184. Increases the ride height of the rear spring about 30mm when not loaded / increases the ride height about 45mm when loaded, results vary between different models
- 185. This kit has been developed for vehicles that are constantly driven loaded, operation in the unladen state may result in a harsher ride than is desirable
- 195. Due to the wire thickness of the front spring the original bottom spring seat needs a small modification, bend the small metal edge at 0.25 coil 3mm open so the spring can move freely
- 200. The springrate of the rear spring is 30% higher then the original rear spring
- 202. The springrate of the front spring is approximately 20% higher then the original front spring

| Brand | Model | Engine | Chassis | Type | Year | Lowering | Lowering | Notes | Pricing |
|-------|-------|--------|---------|------|------|----------|----------|-------|---------------|
| | | | | | | Front | Rear | | Excl. 21% VAT |

- 207. AWD: increases the ride height of the front spring about 20mm / the spring rate is approximately 20% higher than the original spring rate
- 208. Increases the ride height of the rear spring about 20mm when not loaded / increases the ride height about 50mm when loaded, results vary between different models
- 210. The springrate of the rear spring is approximately 20% - 30% higher than the original rear spring
- 211. The spring rate of the front spring is approximately 30% higher than the original spring rate
- 212. The spring rate of the rear spring is approximately 100% higher than the original spring rate
- 217. Wheelbase 3640mm / 4490mm
- 218. Vehicle length: 5968mm till 7104mm / L3/L4/L5
- 219. The set consists of 2 front springs + 2 leaf spring pads, he rear axle is raised by spring pads
- 220. Front axle 35-45mm lift (depending on wheelbase)

We recommend to have the installation of our lowering springs done by a specialist workshop having the experts and special tools. Prior to assembly, it is absolutely necessary to read the TUV expertise comparing it with the data of the car and the delivered chassis part in order to exclude future assembly and technical problems concerning the TUV.

BRAKE POWER REGULATOR

In the case of cars which are equipped with load-dependent brake power regulator on the rear axle, we recommend to check this regulator and in case, to have it re-adjusted by your specialist workshop.

ABS

In case of cars with anti-blocking system, the sensors have to be accurately re-adjusted after mounting our lowering springs.

LEVEL ADJUSTEMENT

For cars equipped with level adjustment, it must be re-adjusted after mounting our lowering springs.

WHEEL ADJUSTEMENT

After mounting our lowering springs, the wheel adjustment values have to be checked.

MEASURING METHOD

The lowering indicated by us results from the difference between the standard ride-height (distance between fender and the center of the wheel) and the ride-height after lowering. You should take into consideration that in case of lowering carried out by the factory, the dimensions are reduced by this lowerage.

NOTES

1. Not suitable for Diesel models.
3. Not suitable for 4WS (4 wheel steering) models.
4. Not suitable for models with EDC-system.
5. Not suitable for models with High-Ground-Clearing (HGC) systems.
6. Not suitable for 16V/20V/24V and RSI models.
7. For standard lowered cars; only suspensionkits are recommended.
8. Not suitable for cars equipped with standard sportsuspensions.
9. Set only contains two rear springs.
10. These lowering springs can only be used with shortened shock absorbers.
11. Not suitable for cars with level adjustment.
12. Not suitable for cars with automatic or electronic shock absorbing regulation.
13. Not suitable for 4WD (four-wheel drive) cars.
14. Not suitable for station wagons.
15. Not suitable for cars with hydropneumatic suspension.
16. For models up to 8/79, the original springs holders (Art.No.861412113B) must be used on the front axle.
17. For models up to 8/79, the original springs holders (Art.No.171412341A) must be used on the front axle.

| Brand | Model | Engine | Chassis | Type | Year | Lowering Front | Lowering Rear | Notes | Pricing Excl. 21% VAT |
|-------|-------|--------|---------|------|------|-------------------|------------------|-------|--------------------------|
|-------|-------|--------|---------|------|------|-------------------|------------------|-------|--------------------------|

18. For cars from 10/93, it may be necessary, due to different spring holder sizes on the front axle, to use the original spring holder (Art.No.1HO-412-341).
19. Not suitable for cabriolet, convertible designs.
20. Mounting instructions for W201/202/123/124/126: Max. lowering is obtained by using single points (single stud) spring rubber bases on the front and rear axles.
In case, the 3 point or 4 point rubber bases installed by the manufacturer have to be exchanged accordingly (spare part available from DB agents) in case of corresponding accessories, as automatic shifting, air conditioning etc. However on the front the 3 point or 4point rubber bases must always be used in case of trailer operation (trailer coupling) on the rear axle, 3 point rubber basses must always be used.
21. Excluding M-models, S4 models and cars with Audi sport chassis.
22. For 16V + VR6 and TDI, we recommend to change to sportshock absorbers.
23. We recommend to shorten the bump stops to 30mm.
24. Lowering only suitable at the front axle.
25. The bumpstop must be shortend to 45 mm.
26. In the case cars with a level regulation facility, the rear of the car can be lowered by approx. 15mm if desired by changing the settings on the level regulation system.
27. Not suitable for "Turbo" models.
28. Special Tuning set. Installation must be done by professionals due to the extreme lowering of this setmodification may be necessary.
29. The indicated lowering can differ up to 25mm due to different models and options.
30. Not suitable for VR-6 models with Air Conditioning.
31. The indicated lowering is the effective lowering. Standard lowering has already been considered.
32. Not suitable for Kadett City.
33. Not suitable for GTI/GLI/GTE/GLE/GSI models.
34. Conical front spring.
35. Cylindrical front springs.
36. Not suitable for cars with Full Options.
37. Only for cars with Full Options.
38. Not suitable for cars with Automatic Transmission.
39. Only for cars with sportsuspension.
40. Not suitable for cars with Air Conditioning.
41. By choosing the lowering please note that the standard ride height in the front and in the rear is very different. After installations the lowering often appears to be different from the indicated lowering in the catalogue.
42. Only suitable for 2 and 4 doors.
43. Not suitable for G40 models.
44. For cars with standard lowering, the indicated lowering will be reduced with the amount of the standard lowering.
45. We recommend to use shortend shock absorbers for this set.
46. Cut off one ring from the top of the bump rubber, always cut from the top.
47. The bumprubber from the front: cut one ring off from the middle of the rubber and glu the top back on.
48. This set is only useble with the original shock absorber. With other shock absorbers the lowering set will not have enough preload.
49. For the Volvo V70 with automatic level adjustment, you can use the original shockabsorber from the Volvo S80. (Most of them don't have automatic level adjusted shock absorbers).Original Volvo shockabsorbern: 8671-712
50. Mount the front spring with the progressive part up !!, this is very important.
51. Take a good look how to mount the rear springs, this is very important.
53. Take the rubber that is on the original spring off and put it on the loweringspring on the same place
54. Mount the rear spring with the white mark to the rear. This is very important.
55. Mount the rear spring with the progressive part up !!, this is very important.
56. Mount the rear spring with the progressive part down !!, this is very important.
57. Mount the front spring with the progressive part down !!, this is very important.
58. We recommend to shorten the rear bumpstop 10 mm.
59. Cut off the piece of the bumprubber after the plastic ring.
60. Lowering only suitable for rear axle
61. Bumpstop front : cut off 2 rings bottom / bumpstop rear: cut off 1 ring bottom
62. The bumpstop must be shortend to 40 mm.
63. Bumpstop front: cut off 20 mm from bottomside and remove plastic ring
64. The front bumpstop must be shortend to 20 mm.
65. TUV is not suitable for 540i

| Brand | Model | Engine | Chassis | Type | Year | Lowering | Lowering | Notes | Pricing |
|-------|-------|--------|---------|------|------|----------|----------|-------|---------------|
| | | | | | | Front | Rear | | Excl. 21% VAT |

66. The front bumpstop must be shortend 15 mm from topside.
67. Cut off 1 ring from bump rubber
68. No TUV available on the stationwagon, only suitable on the saloon.
69. TUV only suitable with normal original bumpstop or sport original bumpstop. Do not shorten the bumpstops!! With the sport bumpstop the lowering will be a little more and also the driving will be better.
70. The MB E-class S211 has standard level adjustment at the rear. So the car can be lowered at the back by setting the level adjustment. Therefore this set only contains frontsprings.
71. This partnumber is not GOCA (TUV) approved for Belgium.
72. When used with a TUV certificate, be aware of the minimum height of the blinker/indicator. This must be at least 350mm. If this is not correct the blinker/indicator must be moved to another place.
73. From chassis nr.: GG1***233651
74. Till chassis nr.: GG1***233651 / set contains two different front springs, see code on springs
75. Not suitable for cars with multilink rear suspension
76. Not suitable for cars with sportsuspension + S-line
77. Only suitable for Touring cars with air suspension at the rear(set contains only front springs)
78. Not for California
79. Not suitable for cars with Hydractive III + suspension
80. Not suitable for Qashqai+2
81. We recommend to shorten the rear bumpstop
82. Model Year 2011, upper springseat diameter is 83mm
83. About 10mm less lowering for vehicles with Audi sport-suspension
84. About 20mm less lowering for vehicles with Audi S-line sport-suspension
85. Only suitable for vehicles with multilink rear suspension.
86. About 15mm less lowering for vehicles with sportsuspension.
87. Only suitable for vehicles with torsion-beam axle
88. Not suitable for vehicles with torsion-beam axle
89. Cut off 2 rings from the bottomside of the front bumpstops for extra lowering at the front
90. Not suitable for 2WD (Two-Wheel Drive) cars
91. Set only contains 2 front springs
92. Zu Buchstabe "E" in der 10.ten Stelle der Fzg-ident-Nr.: WOLGxxxxxExxxxxx/till letter "E" on the 10th digit of VIN
93. Ab Buchstabe "E" in der 10.ten Stelle der Fzg-ident-Nr.: WOLGxxxxxExxxxxx/from letter "E" on the 10th digit of VIN
94. About 10-15mm less lowering for vehicles with FR suspension.
95. The rear of the car can be lowered by the vehicle diagnostic system
96. Not for configuration codes: SA950 / SA483 + 213, P84, the configuration codes can be taken from the data card of the vehicle
97. Not suitable for double cabin/5-seater/7-seater
98. Not suitable for 2014 facelift and later
99. Also suitable for Facelift model Magnetic Suspension
100. Only for European Version
101. Only for cars with frontsprings of Di=121/126
102. Only suitable for vehicles to chassis no. 3603471
103. Only suitable for vehicles from chassis no. 3603472
104. About 15mm less lowerering for vehicles with S-line suspension
105. Not suitable for vehicles with AMG suspension
106. About 10mm less lowerering for vehicles with M-sport suspension
107. About 10mm less lowerering for vehicles with Adaptine M-sport suspension
108. Only suitable for vehicles with factory raised payload
109. Not suitable for vehicles with factory raised payload
110. Only suitable for vehicles with standard payload
111. Not suitable for vehicles with standard payload
112. Wheelbase: 2925mm
113. Wheelbase: 3275mm
114. Vehicle length: 4606/4609mm

| Brand | Model | Engine | Chassis | Type | Year | Lowering | Lowering | Notes | Pricing |
|-------|-------|--------|---------|------|------|----------|----------|-------|---------------|
| | | | | | | Front | Rear | | Excl. 21% VAT |

- 115. Vehicle length: 4956/4983mm
- 116. Vehicle length: 5308/5333mm
- 117. Kastenwagen geschlossen / gesloten bestel
- 118. Kastenwagen doppelkabine / dubbele cabine
- 119. VERVALLEN
- 120. 30mm lowering for John Cooper Works ALL4
- 121. Not suitable for facelift model 07/2018 and later
- 122. The indicated lowering can differ due to different variants and options
- 123. About 30mm lowering for Vito Crew Van
- 124. Suitable for vehicles with factory comfort suspension (code 485)
- 125. Suitable for vehicles with factory comfort and lowered chassis suspension (code 677)
- 126. About 15-10mm less lowering for vehicles with factory comfort and lowered chassis suspension (code 677)
- 127. Not suitable for vehicles with factory sport suspension / AMG-sport suspension (code 486)
- 128. Suitable for vehicles with factory sport suspension / AMG-sport suspension (code 486)
- 129. Suitable for vehicles with configuration codes: 950/P84, the configuration codes can be taken from the data card of the vehicle
- 130. Not suitable for vehicles with factory comfort suspension (code 485)
- 131. Not suitable for vehicles with factory comfort and lowered chassis suspension (code 677)
- 132. Not suitable for Colt Rallyart
- 133. With and without cup suspension
- 134. About 25mm less lowering for vehicles fitted with factory sports- or M-Sports suspension
- 135. The front coil-spring part number changed in February 2004 coincides with a specification change in shock absorber
- 136. From chassis nr.: GY1***167620
- 137. Till chassis nr.: GY1***167620 / set contains two different front springs, see code on springs
- 138. Due to the long wheel base and the lower ground clearance, daily practicality over speed bumps and sharp inclines will be limited with this lowering kit
- 139. Not suitable for Ford Focus Vignale
- 140. Not suitable for vehicles with Magneride suspension
- 141. Not suitable for vehicles with self leveling air suspension on the rear axle
- 142. Due to the lower ground clearance, caution needs to be taken to protect the battery pack
- 143. We recommend to install the shortened rear bump stops from a Fiat Turbo Coupe part.nr. 7782710, length appr. 60mm
- 144. The rear spring change in early 1999 relates to the introduction of the heavy-duty 6-cylinder rear axle on 4-cylinder models
- 145. We recommend to shorten the rear bumpstop 30mm from the bottom for better comfort
- 146. The rear consists of adjustable lowering links
- 147. The adjustment ratios for the rear axle are as follow: Per 1 mm shorter = 10mm lowering on the vehicle. Per 1mm taller is a 10mm taller ride height on the vehicle
- 148. The rear consists of an adjustable flip kit for the leaf springs, consisting of metal plates.
- 149. TÜV/Goca only valid for cars with 66kW-142kW
- 150. Only for vehicles with high performance package
- 151. Short wheelbase / 2785mm
- 152. We recommend to shorten the rear bumpstop 65mm from the bottom for better comfort
- 153. The ride height is lowered about 25mm on vehicles with performance suspension
- 154. Not suitable for vehicles with airsuspension
- 155. About 20mm less lowering for vehicles fitted with Koni shock absorbers and Eibach Springs
- 156. We recommend to shorten the rear bumpstop 22mm for better comfort and 10mm extra lowering
- 157. Not for vehicle with AMG Trial Package
- 158. Only suitable for vehicles with a frontspring with a diameter outside of 202mm
- 159. Not suitable for vehicles fitted with Koni shock absorbers and Eibach springs
- 160. Remove the rubber on the bottom of the rearspring by carefully heating it up until spring comes loose, reuse on rear lowering spring
- 161. Not for GTS 3.4/3.8 GT4
- 162. About 15-20mm lowering for vehicles with PASM sportsuspension
- 163. Not for GTS 4.0
- 164. About 20mm less lowering for vehicles with Audi sportsuspension
- 165. Not suitable for V60/S60 Polestar Engineered
- 166. Not suitable for vehicles with factory raised ground clearance

| Brand | Model | Engine | Chassis | Type | Year | Lowering Front | Lowering Rear | Notes | Pricing Excl. 21% VAT |
|-------|-------|--------|---------|------|------|-------------------|------------------|-------|--------------------------|
|-------|-------|--------|---------|------|------|-------------------|------------------|-------|--------------------------|

- 167. Short wheelbase: 2716mm
- 168. Not suitable for vehicles with 1000kg payload
- 169. Also for vehicles with high performance package
- 170. Not suitable for vehicles with 650kg payload
- 171. Long wheelbase / 2975mm
- 172. Only for vehicles without sport suspension
- 173. Not for vehicles with R-Design sport suspension
- 174. we recommend: remove serial distance blocks up to 20mm, over 20mm replace with 5mm spring pads / from 30mm replace with 10 or 15mm spring pads
- 175. Rear suspension: remove the lower plastic spring seat on the suspension arm by pushing the plug out underneath the suspension arm.
Replace the lower plastic spring seat with the supplied rubber spring seat.
Make sure the bottom tip of the spring pointing towards the outside.
- 176. Lowering the rear axle by using the included springs pads beneath the sideward seat area of the composite leaf spring
- 177. Removing the rear spring pads completely is also an option
- 178. The ride can be harsh when the vehicle is loaded
- 179. FWD: increases the ride height of the front spring about 30mm / the spring rate is approximately 30% higher than the original spring rate
- 180. FWD/AWD/2.5PHEV: increases the ride height of the rear spring about 20/25mm when not loaded / increases the ride height about 40mm when loaded
- 181. For a correct ride height the lowering links should be adjusted to a length of 68-72mm center to center
- 182. For a correct ride height the lowering links should be adjusted to a length of 64-68mm center to center
- 183. Increases the ride height of the front spring about 25mm / the spring rate is approximately 20% higher than the original spring rate, results vary between different models
- 184. Increases the ride height of the rear spring about 30mm when not loaded / increases the ride height about 45mm when loaded, results vary between different models
- 185. This kit has been developed for vehicles that are constantly driven loaded, operation in the unladen state may result in a harsher ride than is desirable
- 187. 1mm of adjustment on the lowering link will adjust the vehicle height by approx. 5mm
- 188. Min. ride height approx. 355mm in the rear, measured from center of wheel to wheel arch, more lowering will result in poor ride quality
- 189. Lowering the ride height reduces the amount of air in the suspension. Lowering excessively might cause errors in the computer
- 190. The adjustment ratios for the rear axle are as follow: Per 1 mm shorter = 10mm lowering on the vehicle. Per 1mm taller is a 10mm taller ride height on the vehicle
- 191. Advised position of the spring seats at rear axle (slot adjustment), slot from the bottom: 3/5, optional 2/5 for vehicles with sport design package
- 192. With / without front axle lift system
- 193. Only for vehicles with sport suspension or vehicles with PASM sport suspension
- 194. Not for vehicles with standard suspension, not for vehicles with PASM standard suspension
- 195. Due to the wire thickness of the front spring the original bottom spring seat needs a small modification, bend the small metal edge at 0.25 coil 3mm open so the spring can move freely
- 196. We recommend to shorten the rear bumpstop 34mm from the bottom for better comfort and 15mm extra lowering
- 197. Long wheelbase: 3100mm
- 199. Increases the ride height of the rear spring 25mm when not loaded / increases the ride height approximately 30-35mm when loaded
- 200. The springrate of the rear spring is 30% higher then the original rear spring
- 201. We recommend a minimum load of 200kg
- 202. The springrate of the front spring is approximately 20% higher then the original front spring
- 203. The springrate of the rear spring is approximately 20%-25% higher then the original rear spring
- 205. Not suitable for WRX GT models with electronic dampers
- 206. Mount the supplied rubber springseat on the underside of the rear lowering spring
- 207. AWD: increases the ride height of the front spring about 20mm / the spring rate is approximately 20% higher than the original spring rate
- 208. Increases the ride height of the rear spring about 20mm when not loaded / increases the ride height about 50mm when loaded, results vary between different models
- 209. Increases the ride height of the rear spring about 30mm when not loaded / increases the ride height about 40mm when loaded
- 210. The springrate of the rear spring is approximately 20% - 30% higher then the original rear spring
- 211. The spring rate of the front spring is approximately 30% higher than the original spring rate
- 212. The spring rate of the rear spring is approximately 100% higher than the original spring rate
- 213. The inside diameter of the rear lowering spring is 113mm / the outside diameter of the rear lowering spring is 147mm
- 214. The inside diameter of the rear lowering spring is 99mm / the outside diameter of the rear lowering spring is 126mm
- 217. Wheelbase 3640mm / 4490mm
- 218. Vehicle length: 5968mm till 7104mm / L3/L4/L5
- 219. The set consists of 2 front springs + 2 leaf spring pads, the rear axle is raised by spring pads
- 220. Front axle 35-45mm lift (depending on wheelbase)
